Don't Stand Still, Mate ... Animate

Course Description

In this course, students will get an introduction of what an animation is and how it can be an effective way to tell stories. Students will be exposed to three types of animations that are most commonly seen on TV and in movies today and explore how each of them are created by professionals in the field. They will then learn to create their own simple animations using the flip book method as well as using a computer program to create a digital animation.

Learning Outcomes

- Get a basic understanding of what an animation is, and some common types of animation that they see on different media
- Understand how common types of animation are created
- Create a simple flip book animation using pencil and paper
- Create a digital flip animation using a web application

English Language

Beginner level and up

Required Materials & Equipment

A computer or mobile device, a notebook or sketchbook, index cards or a sticky notepad
